

Semi-chisel

This chain is the best compromise between efficiency-high speed and life of the product; ideal for any type of wood.

Its tapered-outlined teeth is comparatively easy to use and tolerates little sharpening mistakes.

Chisel

This chain is almost always requested and destined to the professional sector.

Its square-edged teeth offers excellent performances in cutting down particularly hard wood.

Consumer

All "Consumer" bars have sprockets and a multi-layer structure, for D. I. Y. jobs.

Microlite / Pro am Pro-lite

Microlite / Pro am / Pro-lite bars have a sprocket tip and are of medium quality, suitable for agricultural use.

Power Match

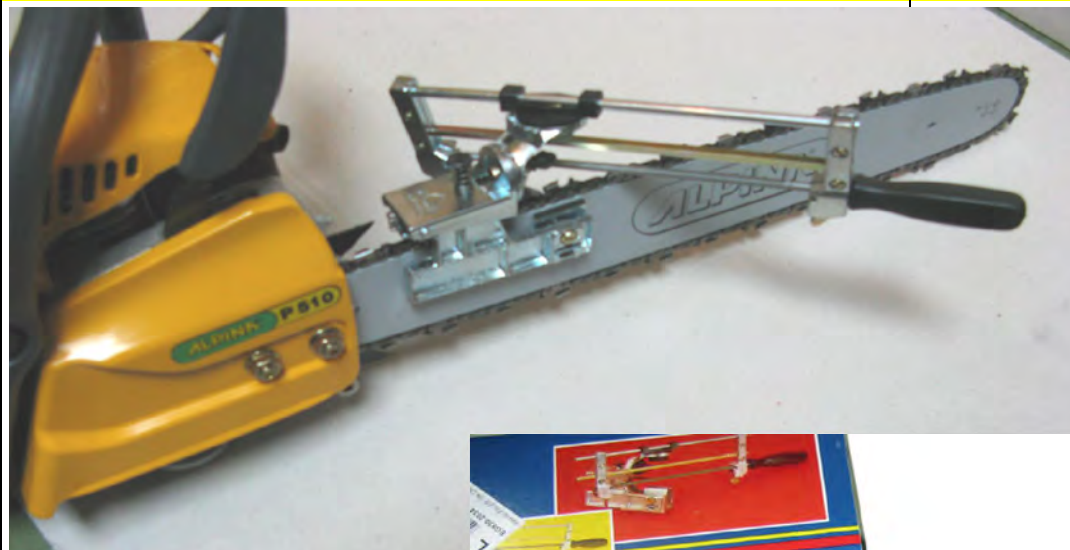

"Prof." bars have professional features with inserted sprocket tip (or wheel, if indicated).

Laser type

"Prof. laser type" bars have professional features and a stellite point.
